

## Woorim Foreshore Community Tree Planting

The Woorim Foreshore on Bribie Island is a sensitive foredune and riparian habitat, breeding ground for the critically endangered Loggerhead Turtle and habitat for migratory shorebirds protected under international agreements.

Join Bribie Island Rotary and Conservation Volunteers Australia as we team up to plant native coastal vegetation along Woorim Foreshore to restore habitat and improve dune stabilisation.

No prior experience is necessary, our friendly team leaders will teach you everything that you need to know on the day!
